## IN THE LEGISLATURE, Booklet Issued On Flax

By H. C. HAMMELL, M.L.A.

The past week has seen the passing of considerable legislation which brings the House near completion for this session. Most of the time has been taken up by the committee of the whole Assembly in discussion of the bills before the House.

This week I am giving you a few of the highlights of some of these bills not already reported through the courtesy of the editor of this paper.

An amendment to the Setting of Poison Act authorizes the Fish and Game Commissioner to distribute certain poisons known as "Coyote Getters". These are distributed only to Game Officers and persons recommended by the R.C.M.P.

An amendment to the Agricultural Weed Board Act gives power to the Municipal Council and the Minister of Municipal Affairs for the leasing of weed infested land to an approved tenant on whatever terms may be decided proper to the farms reclamation. By experience municipal districts have found that equipment and labor are not always available when required and that an agreement with the owner to carry out reclamation plans was before, in many cases, not practical.

A change in the Succession Duty Act says that any individual may bequeath any part of his estate to a school district or school division and such part of his estate will be exempt from succession duty. The act before included the University of Alberta and this part has not been changed.

The Municipal District Act has been changed to provide for representation of the school division, which forms a part of the municipal district, to attend the council meetings and take part in discussions relating to school matters. It also provides for the arrangement by the council for a member of theirs to attend divisional

board meetings. As school divisions secure their revenues by requisitions on the municipalities, this change is considered desirable. A new section authorizes the municipal council to enter into agreements for the provisions and distribution of electricity, gas and power. Provision is made for the necessary approval of two-thirds of the proprietors voting on such a proposition in any municipality before it can be started.

The assessed value of farm lands situated in any district containing city, town or village, may be reduced by the minister of education for the purpose of apportioning the requisition from the rural section of the school district.

A new bill provides for the incorporation of the Alberta Industrial Corporation, the corporation will be empowered to loan money for developing or expanding manufacturing or industrial businesses within the province. The corporation will raise money by the issue and sale of debentures up to the sum of five million dollars guaranteed by the province. The municipal and public boards may invest in these debentures. The government will advance \$100,000 to the corporation as a loan. The purpose of this bill is to provide for the expanding and development of Alberta industries and to provide an opportunity for the citizens of Alberta to invest their money. Albertans will have an opportunity of investing their money in Alberta industries, in preference to having outside and foreign capital doing the investing and receiving many of the benefits from the investment.

An amendment to the Co-operative Marketing Associations Guarantee Act, authorizes the government to guarantee the borrowings by a co-operative association, which has as its principal object supplying of electrical energy and power to its members.

A government announcement to the effect that the guaranteed price for flax seed effective August 1st next, will be increased from \$2.75 to \$3.25 per bushel, places this crop on an excellent cash return basis, and it is expected that more flax seed will be sown this year in view of the world shortage in flax and vegetable oils.

Grave concern at the alarming decrease in flax acreage in Canada had been expressed at a recent meeting of the National Barley and Linseed Flax Committee held at Winnipeg. A statement issued by the chairman said that unless the situation was remedied in the near future the effects would be far-reaching and decidedly harmful.

It was brought out at the meeting of the committee that the need for flax is no less than during the war. There is still throughout the world an urgent demand for vegetable oils and the most important oil producing crop grown in this country is flax. Flax has many by-products and if the supply is cut off, the farmer himself is directly affected.

Every day he uses flax products in the form of linseed meal for his cattle, paint for his buildings and farm machinery and in numerous other ways important to the successful operation of his farm.

In an effort to ease present conditions and to help farmers profitably increase their flax acreage the National Barley and Linseed Flax Committee have just released a new flax book entitled "The Truth About Flax." This book was written by men who have studied and know every phase of flax production and contains useful information to enable farmers to obtain maximum yields by latest methods of cultivation.

Illustrating the scope of the market for flax and the shortage of this commodity, briefs submitted at the National Barley and Linseed Flax Committee meeting showed that a shortage of linseed oil would seriously affect Canadian industries such as the paint and varnish industry and the linoleum industry. For to both linseed oil is their life blood. With the huge building projects planned in the post war era for town and country, flax will be in urgent demand for some time to come.

Flax authorities at the meeting pointed out that there was little possibility of Canada obtaining flax or linseed oil from abroad. Only a few countries in the world produce flax, but linseed oil will be in great demand from all countries for the enormous reconstruction necessary to repair the ravages of war.

The book "The Truth About Flax" sponsored by the committee has been approved by the Manitoba, Saskatchewan and Alberta departments of agriculture and shows how flax can become one of the most profitable cash crops.

A free copy can be secured simply by addressing a request to the National Barley and Linseed Flax Committee Winnipeg, Manitoba.

Freedom won through force of arms can only be kept through strength of character.

The problem of my home may be simple. It may be me.

### SEED BARLEY

An appeal has been sent out to farmers to concern themselves with obtaining needed supplies of seed barley for spring planting. Every effort should be made in this respect. If found unable to obtain local

supplies, contact of the local district agriculturist should then be made. Barley production is urgently needed both for feeding and malting purposes. Farmers are asked to increase barley acreage by nine percent in 1946.

## WORLD HAPPENINGS BRIEFLY TOLD

The United Kingdom will spend £25,000,000 (\$111,250,000) on its secret service in 1946 against a token £100 (\$445) in 1945.

The United States war department announced an intention to make a fuller use of Negro manpower both in the peacetime regular army and in the event of a future war.

Lord Nuffield, British industrialist, who was recently in Capetown on his way to Australia, said Britain will soon be able to supply the dominions with a steady flow of goods.

In shirt sleeves and apron, a porter at a Glasgow auction bought a 10-stone diamond necklace for £5,100. He was buying for a Glasgow man who wanted to remain anonymous.

Recent foreign economic administration surveys indicate that millions of Europeans are living far below the minimum of 2,000 calories a day.

Bertram C. Webber, 87, for many years associated with the Dominion Meteorological Bureau, died at his Toronto home. He joined the meteorological staff under Sir Frederick Stupart.

The British taxpayer can expect little relief from Hugh Dalton, chancellor of the exchequer, in his April budget. Civil and defence estimates indicated 1946-47 government outlay will be about £4,000,000,000.

Bermuda girls, white or colored, may apply for training in England for nursing. Details of the scheme are announced in the colony for a training period of three years or more and applications are invited.

Col. Arthur Welsh, minister without portfolio in the Ontario Government and minister-designate of the new Ontario Tourist Department, said that 20,000,000 United States residents are expected to visit Canada this year.

4921  
SIZES  
12-20

By ANNE ADAMS

For YOU . . . For anyone's trouser! Make Pattern 4921, a beautiful and well-fitting nightgown with its own ballet-inspired comfy slippers. This lovely set's SIMPLE sewing!

Pattern 4921 in 12, 14, 16, 18, 20, Size 16, nightgown and slippers 3 1/2 yds, 39-in.; soles 1/2 yd, 35-in.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

## PENICILLIN FOR CATTLE

Research scientists in Britain are using penicillin to cure dairy cattle of mastitis, one of their most serious diseases, reports the Manchester Guardian. The results are "almost too good to be true," says Prof. Scott Watson, chief education and advisory officer of the ministry of agriculture.

## ASSURANCE FOR POLES

A foreign office spokesman said the Warsaw government had given "explicit assurances" that Polish troops abroad returning to Poland would not be molested because of political beliefs, and British officials predicted their early demobilization.

**HITLER'S CHALET WILL BE SERVICEMEN'S HOME**—Berchtesgaden is one of the cities and towns selected in Germany and Austria where thousands of American families will live when the occupation soldiers' wives and children start arriving. Some of the families will be able to set up housekeeping in Berchtesgaden beneath Adolf Hitler's shattered, high-perched dwelling. Photo shows what was Hitler's chalet at Berchtesgaden.

## Takes Entire Output

**UNRRA Buys All Horse Meat United States Packers Can Supply**

Two million pounds of United States horse meat has been shipped to foreign nations but the United Nations Relief and Rehabilitation Administration has requests for 300,000,000 pounds more and has told packing plants it will take their entire output for 1946.

An U.N.R.R.A. spokesman estimated, however, that only about 100,000,000 pounds will be available.

The meat is purchased by the agriculture department for canning or curing in Federal-approved horse-meat processing plants. The ceiling price is 13 cents a pound, at the plant, for cured or pickled meat and 16 cents for canned.

U.N.R.R.A. also is aiding European nations to replace the thousands of work horses killed during the war. The lack of them has delayed farming. Draft mares are being shipped abroad for breeding and as work animals.

The mongoose, killer of slow-moving cobras in India, cannot cope with the faster poisonous snakes in the new world.

## GEMS OF THOUGHT

### ASSURANCE

The shortest and surest way to live with honor in the world, is to be in reality what we would appear to be.—Socrates

It is wonderful what strength of purpose and boldness and energy of will are roused by the assurance that we are doing our duty.—Scott

Anxiety is a word of unbelief or unreasoning dread. We have no right to allow it. Full faith in God puts it to rest.—Horace Bushnell

Trust Truth, not error; and Truth will give you all that belongs to the rights of freedom.—Mary Baker Eddy

When you have read the Bible, you will know it is the word of God, because you will have found it the key to your own heart, your own happiness and your own duty.—Woodrow Wilson

Before me, even as behind, GOD IS—and ALL is WELL.

—Whittier

To Feel Right — Eat Right!

Answer To Last Week's Puzzle

## Value Of Tooth Health

**Neglected Teeth May Lead To Chronic And Serious Disease**

Tooth health has its effect on the entire body. A decayed tooth if neglected may lead to chronic, serious or even fatal disease.

Such is the admonition in a pamphlet insert—"See Your Dentist Twice a Year"—issued by the Industrial Division of the Health League of Canada.

The pamphlet states that authorities are of the opinion that carbohydrates seem to be the greatest source of tooth decay and should be used in strict moderation. On the other hand, uncooked foods such as green vegetables, raw fruits and dairy products, are good for the teeth.

"After diet comes exercise," says the Health League pamphlet. "Teeth need exercise to be healthy. Vigorous chewing does the trick."

Teeth should be brushed after every meal, the uppers downward and the lowers upward. The top surface of back teeth should be brushed vigorously, and the mouth should be washed out with clean water.

Snowflake patterns are preserved now by a plastic process.

## Helped Win War

**Most Important Scientific Invention Was Work Of English Professor**

The story of the invention of the cavity magnetron—the most important scientific invention of the war—was told in London for the first time recently. It is the cavity magnetron, which was to a great extent instrumental in virtually winning the war before the atom bomb was used. It is a tiny instrument about the size of an ink bottle in which electrons are whirled around, producing a series of vibrations and hence waves, somewhat on the analogy of a siren. With it the inventor, an English Professor, J. T. Randall, was able in 1940 to produce short radio waves with an intensity one thousand times greater than had ever been available before. Introduction of the magnetron led to a revolution as great as the invention of radar itself. It had an essential part in winning the Battle of the Atlantic, in the bombing of the German war machine and a score of other major Allied victories.

Chief sardine fisheries of the world are the Mediterranean coasts, the Bay of Biscay and the coast of Maine.

BY GENE BYRNES

I KNOW A THING  
OR TWO ABOUT  
GOOD BREAD!

I KNOW A THING  
OR TWO ABOUT  
GOOD YEAST!

CUT FOOD COSTS...  
RAISE FOOD VALUE

with "MAGIC" EGG ROLL

2 c. flour  
4 tsp. Magic Baking Powder  
1/2 tsp. salt  
4 tbs. shortening  
1 egg  
1 1/2 c. milk  
5 hard-boiled eggs  
4 tbs. milk  
2 tsp. lemon juice  
3 tsp. chopped onion  
2 tbs. chopped parsley  
2 tbs. chopped green pepper  
1 tsp. dry mustard  
Salt, pepper, paprika

Sift together first 3 ingredients. Cut in shortening. Beat egg in measuring cup; add milk to make 1/2 cup; add to first mixture. Roll out 1/4 inch thick, on floured board. Chop hard-boiled eggs, mix with remaining ingredients, spread on dough. Roll up like jelly roll and bake in hot oven (425° F.) 30 minutes. Serve with cheese sauce.

## OUR COMPLETE SHORT STORY—

## THREE RED ROSES

By EVA-LIS WUORIO

Copyright  
Wheeler Newspaper Syndicate

SARA swung her chair so that her back was to the noisy city room. She tried to concentrate on the geometric patterns of the houses and roof-tops, edging off a rectangular square of sky. Then she attempted to count the peeling telephones behind her, sharp daggers of sound, piercing through the din of the typewriters. But the voice of Jimmy the office boy would not be stilled. Cheerily it spoke:

"Here it is, ten thirty sharp. He still loves you."

"Leave it on the desk," Sara said in her husky, small voice, keeping her back turned. A grey florist's box, with a purple paper around it, containing three red roses in crinkly, thin green paper—that's all it is, she thought. But that isn't all it is, she thought bitterly. It's much more than that. It's disaster and then it's attainment. It's brazen and audacious and pathetic all at the same time. It was a door into a way of life I never knew before, she thought, and now it's closing. It's my fault it's closing with a bang. It's my own fault, she thought.

I wonder whether it was worth it—the pretense and all, Sara's eyes gazed unseeing out of the window. I wonder whether it was worth the camaraderie and the jests and the belonging to the gang. And Dan Leary pretending to be jealous when he'd never even noticed me before, and the party in Chinatown with people from all the newspapers after the troop-train story last Friday. She'd never been included in anything like that before. She'd been so glib, almost as blasé and witty as the rest of them, wisecracking too. It was wonderful.

She gave a kick with her foot and her chair swung to face her typewriter. Her eyes clouded. There was the grey box. The beginning and the end. No, no, Sara thought, I'm being ridiculous—it's nothing but a grey florist's box as any fool can plainly see.

"And still they come," Dan Leary paused by her desk and poked at the box with his finger. Forty days ago he didn't know she existed. Forty days ago she cared bitterly about that and now it didn't matter. "Forget that guy for just one night and come out with me," Dan grinned down at her.

A typical Hollywood newspaper man, Sara thought. Forty days ago I'd have died if he'd asked me to go out, died of sheer wondering pleasure. And now—I might as well get it over and done with. She stood up abruptly.

She picked up the box distastefully and tucked it under her arm. The Assistant City Editor who was a rose fancier stopped her on the middle of the floor to ask her what they were today. From the head of the horse-shoe the cable editor called at her: "Just give me his address and I'll wire him anywhere how pretty you look with his posies!" The rest of the copy readers turned to grin at her. She'd learned how to answer them with a quip and a smile these past forty days—but it didn't come off today.

This darn city room is too large, she thought. I'll never get out of it. She tried to grin feebly at the boys as she went by. And then, finally,

she was in the hall and before the door marked. "Private. Managing Editor."

This is the end, Sara thought. I can't do it. I have to. Stop being melodramatic, Sara, she told herself. She pushed the door open and sighed in swift relief that Miss Phipps, his secretary, was out. Perhaps he would be out, too!

She knocked on the inner door and walked in before he could answer. She went swiftly to the table and tore off the purple ribbon, and the box lid, and the green paper. Then, gingerly, she brought out the three red roses.

Behind the desk the man lifted his eyes slowly and looked at the girl. She was small and slight and dark, with a heart-shaped face and too full mouth and grey eyes heavily circled with dark lashes, behind tortoise shell rimmed glasses. She jerked the glasses off and peered at him a little short-sightedly.

"It's all your fault," she said in a husky small voice, "and that's why I've come to you. I've had nothing but church bazaars to cover the year I've worked for you. Probably I look like the kind of a gal who gets along at church bazaars and rummage sales. I hate them. My ego wilted so I couldn't answer when I was spoken to. Not that anyone spoke to me—I never even got slandered! For a reporter to be slandered is a distinction. Mr. Managing Editor. If you'd come out of your crystal tower and figured out what I could do this wouldn't have happened. I used to write good stuff before I came on this rag of yours. Rummage sales and church bazaars—and sometimes for a little excitement the board of education!"

Suddenly a sob choked her throat. She gulped it down. "So that's why I did it. And it worked too. It made them notice me. And I got a couple of nice interviews to do and the city editor said they were all right. And people asked me out. I was one of the gang. And for days I made myself forget it was because of the roses."

Her ridiculously large eyes were filling with tears. Her anger and fright and excitement had worked themselves out. She couldn't go any further. She looked like a bad and sulky child, there, on the other side of the wide, shiny desk.

The grey-haired young man leaned forward in his chair and he said gently: "What did you do, Miss Sunde? And why this offering of roses?"

"Th-that's what I did, Mr. Stuart," Sara said huskily. "I sent myself those roses. That's what made all the difference."

Still evenly John Stuart spoke, "But why tell me about it?"

Sara had got hold of herself and she stood very still and her voice was icy and low: "It costs a lot of money to send yourself three red roses for forty days. I'm in debt. I came to borrow, against my pay, from you." She swallowed suddenly again, and then she said quickly: "You can fire me after I've paid it off."

John Stuart's face was suspiciously expressionless as he reached for a voucher pad and wrote on it. "Here," he said, "Good morning."

Sara swung her chair so that her back was to the noisy city room. She tried to concentrate on the geometric pattern of the houses and roof-tops, edging off a rectangular square of the sky, dully grey this morning, grey as a florist's box. She tried not to think of it but she knew that from today on her ego would begin to crawl back into its shell. She would not know how to go about trying to make people—and herself!—understand she was just the same as when the three red roses had been arriving.

Behind her, Jimmy's voice came through the din of typewriters: "Here it is, ten thirty sharp. He still loves you."

She whirled around with a quick kick and snatched the box from him. Then, slowly, she opened it—the purple paper ribbon, the lid, the green crinkly paper, the three—but no—

It was a gardenia.

A huge white gardenia with sultry fragrance rising from its thick lush petals. There was a white card under the smooth green leaf. Through the printed "John Stuart," was a thick dash and below it a short sentence:

"Would you care to be slandered at dinner tonight?"

The Man in the Crystal Tower."

## MAKING THEM WORK

The Wall Street Journal tells this story. For more than an hour, the candidate for the Legislature had diligently sawed wood in his quest for the rural young widow's vote. Now she came from the house, smiling her approval, as he mopped perspiration from his brow.

"I declare," she said, "I don't know who to vote for—you or Mr. Billings. Why, right now, he's in the kitchen churning."

**Tea Cookies**

1 cup shortening  
2 1/2 cup brown sugar  
1 well-beaten egg  
2 1/2 cups sifted all-purpose flour

1/4 tsp. salt  
3 tsp. each lemon juice, grated lemon rind and orange rind.

1 cup shortening and sugar, add egg, mix thoroughly. Add grated lemon rind and orange rind, add alternately with lemon juice. Mix and sift dry ingredients. Chill. Slice in 1/4 slices. Bake on ungreased pan 6 minutes at 500°.

**Serve with "SALADA" TEA**

## SMILE AWHILE

An attendant in an Aberdeen theatre found a ten-shilling note. She took it to the manager.

Later the following notice was screened:

"A 10s note has been found in cinema. Will the owner please queue up at the box office at 10 a.m. tomorrow."

Wife (discontented): "John, do you think I'm going to wear this old squirrel coat all my life?"

Husband: "Squirrels do, darling!"

Said the instalment collector: "Look here, what do you mean? You've never made a single payment on your piano."

"Well, the company advertises: 'Pay as you play'."

"What has that got to do with it?"

"I don't play."

Professor (at table): "James the first introduced the turkey into this country."

Host (trying to carve): "And this must be the beggar he introduced."

Johnny, who had been taken to the country for the first time, saw a spider spinning a web between two tall reeds. "Father," he called, "come and see this bug putting up a wireless."

"Which would you prefer in your future husband—wealth, ability, or appearance?" asked the pretty girl.

"Appearance, my dear," replied the spinster, "but he's got to appear pretty soon."

Polite foreigner, sitting next to much-travelled lady at dinner: "So you climb Zug Matterhorn? It was a great foot."

She: "You mean 'feat'?"

P.F.: "Ah! So you climb it more dan once?"

"My husband plays tennis, swims and goes in for physical exercise. Does your husband take any regular exercise?"

"Well, last week he was out seven nights running."

Cakes collapse and pies swell at 8,000 feet altitude.

## Grand Relief FROM SNIFFLY, STUFFY DISTRESS OF Head Colds!

DOUBLE-DUTY NOSE DROPS WORKS FAST RIGHT WHERE TROUBLE IS!

Instantly relief from head cold distress starts to come when you put a little Va-tro-nol in each nostril. Also—it helps prevent colds from developing if used in time! Try it! Works fine! You'll like it!

**VICKS VA-TRO-NOL**

## Good Advice to Those WHO SUFFER WITH PILES

Maybe you are one who is troubled with sore, itching, painful piles, keeping you nervous and irritable, making your every bowel movement a dreaded, painful duty. If so you should not delay treatment and run the risk of letting this condition become chronic.

Rectal itching and soreness or painful bowel movements because of piles are Nature's warning to you and you should take steps now to relieve this condition. We make this generous offer directly to you. It gives you a chance to try a simple, home remedy WITHOUT COST if it does not give you prompt and effective action in helping your pile troubles.

Go to any drug store to-day and get a package of Hem-Roid, an internal treatment which directs its medical action to correcting the cause of your piles. Piles are really caused by bad circulation of blood in the lower bowel. They are greatly aggravated by constipation and straining in bowel movements.

The Hem-Roid formula is made especially to help you. It acts in 4 ways. (1) It makes your bowel movements easier and less painful; (2) it relieves the terrible itching and burning; (3) it eases the painful soreness; (4) it aids in healing the sore, sensitive pile tumors. The action of Hem-Roid is quick and reliable. Within a few days you will see what Hem-Roid can do for you. It is easy and pleasant to use—gives amazingly quick and effective action.

Painted by a Professional Model

NOTE—The sponsor of this notice is an old, reliable firm doing business in Canada for over 20 years. Hem-Roid must help your annoying and painful pile condition—must do it quickly, easily and pleasantly or your own test of this remarkably successful formula costs you nothing. Try it today.

## RENEWAL OF UNEMPLOYMENT INSURANCE BOOKS

### To All Employers:

All Unemployment Insurance Books for the year ending March 31st, 1946, must be exchanged for new books.

Kindly communicate immediately with your nearest National Employment Service Office if you have not already exchanged your employees' books.

*There are severe penalties for failing to make Unemployment Insurance contributions for your insured employees and for failure to renew the Insurance Books as required.*

### To All Employees:

*If you are an insured person protect your benefit rights by seeing that your Insurance Book has been exchanged.*

## UNEMPLOYMENT INSURANCE COMMISSION

UIC-2W

## Can You Untie That?

"Can you tie that?" is a favorite expression. "Can you untie that?" would be a question better suited to the times. We are facing the greatest crisis in man's history. And we need to face the fact that, at a time like this, the average Canadian still finds himself tied up in a petty round of meaningless activities.

We are "tied to our desk," "tied up in ourselves" or "fit to be tied." All to what end? To make a living when our desperate priority is to learn how to live. To make money when our need is to make history. To make a name while unnamed ideologies are on the march to replace our names with numbers. To pursue these ends in a world where atom bombs may so soon make an end to all of us. To kill time when there is so little time left.

In such critical days there can only be one meaningful purpose in life. It is to build a world to work. A world fit for heroes of two world wars to live in. A world safe for their children to grow up in. A world secure because it is free from fear and hate and greed. A world which honors and reflects the God who made it.

We need to untie every tie that keeps us from thinking and working towards this one great end. Freed from all our small self-seeking purposes there is not one among us who could not find and take some special place of leadership in building this new world.

### THREE COUPONS FOR APRIL SUGAR

Three of the combined sugar preserves coupons will be valid in April, \$5 on April 4, \$6 and \$7 on April 18, the Prices Board announces. This is not extra sugar, but part of yearly plan for sugar distribution, it is stated.

During the current butter shortage it is felt that having three sugar-preserves coupons valid will give some relief by enabling people to purchase preserves as spreads instead of butter.

Further officials point out that although pink sugar coupons 47-70 expire March 31, persons who have saved up to buy maple syrup or maple sugar may exchange these at the local ration board for a purchase voucher, prior to that date. Purchase vouchers may legally be sent through the mail to order maple syrup from eastern producers, although it is illegal to mail coupons.

## A Graphic Illustration

The municipal enterprises owned and operated by the citizens of Edmonton for purely service purposes effected net savings of around \$23,680,000 in the last 15 years, or over a million and a half dollars a year. No reasonable person could characterize those savings as profits. But it is those savings that the Income Tax Payers Association wants made subject to federal taxation. The association desires to have taken away from the citizens of Edmonton much of the money which they have saved thru co-operation.

Thousands of Alberta farmers have joined together and put in their money, just as did the people of Edmonton to set up utility marketing organizations, the wheat pools, the dairy pools, the livestock co-operative, and so on. They have made savings too, just as did the citizens of Edmonton, but the Income Tax Payers Association, now busily engaged in a propaganda campaign, wants much of these savings to be taken away by the federal government.

If the federal government took all these savings it might increase its revenues by \$125 million a year, but the individual's income taxes would not be reduced by a single dollar.

### PRICES UNCHANGED FOR SEED SPUDS

Price ceilings on seed potatoes sold by primary producers, shippers and wholesalers are unchanged this year, although the retail mark-up is slightly reduced.

Ceiling price regulations apply to all varieties of seed potatoes and cover all grades, certified seed, foundation A and foundation. Seed potatoes must be sold in 100 or 75 pound bags to which the certificate is attached.

Prices vary throughout Canada according to transportation costs from price basing zones. Detailed information is available at the Regional Office of the Prices Board.

### RESTRICTIONS ON PAPER STAY

Because of continued shortages of fine paper restrictions on the manufacture of envelopes, book, writing and specialty paper will continue beyond March 31, the Prices Board state.

## PROTECT YOUR CROPS FROM SMUT

**Farmer**  
Do You Know That

LAST SEASON, TWICE AS MANY

### EAR-MARKING OF MOTOR REVENUES ENDORSED

An adequate network of hard surfaced roads in Alberta would effect an economic saving of at least \$7,000,000 to motor vehicle owners. This was stated in a debate in the legislature last week by Elmer E. Roper, M.L.A.

It would be good business for our people if between \$30,000,000 and \$40,000,000 worth of roads could be constructed in the next year or two, to be paid for over a period of five or six years by ear-marking for that period the more than \$7,000,000 a year we collect from motor vehicle owners.

Officials of the A.M.A. expressed keen interest in the member's remarks, they recalled that for many years the A.M.A. has urged the ear-marking of motor revenues and the use exclusively for road construction and maintenance.

The A.M.A. has made its appeals to members of the legislature to bring this policy into operation, in view of its many inherent advantages to an improved highway system. Also, it has contended that this is only fair to the

motorists who are bearing such a heavy taxation burden.

Adoption of such a policy would mean better roads in all parts of the province, main, secondary and rural.

He—You're not interested in my welfare

She—If the two syllables in that last word were transposed I should be not only interested but enthusiastic.

So many years have passed since George Bernard Shaw first grew his beard, few people remember what he looked like without it.

Do you honestly think beards are an asset? asked a newspaper man.

Without a doubt.

Why do you say that?

Do you realize young man, announced Shaw, I've written at least one play during the time I would have spent shaving.

Well, well, here's a phony artist who made good, and gave the real artists the brush off!

I want to get a nice easy chair for my husband, please

Morris?

No, Jacob.

## "THE TRUTH ABOUT FLAX"

A timely NEW book, containing valuable information on how to profitably increase Flax acreage. Covers accurately and clearly all the latest developments in Flax production including—

Choosing the Field • Flax in the Crop Rotation • Preparing the Seed Bed • Choosing the Seed • Treating the Seed • Early Planting • Keeping Out the Weeds • Harvesting and Marketing • Vital Role of Flax in Canadian Industry • New Markets for Flax Straw

FLAX is a good Cash Crop  
for the Prairie Farmer!

National Barley and Linseed  
Flax Committee  
Winnipeg Man.

Gentlemen: Please send me the new Flax Book "The Truth About FLAX."

Name

Address

All information contained in "The Truth About Flax" has been approved by the Manitoba, Saskatchewan and Alberta Departments of Agriculture.

**BEAVER SHIPS RETURN:** Canada and the United Kingdom were linked again by the famous Beaver line when the Canadian Pacific's new cargo liner Beaverdel docked at Saint John, N.B. in March at the end of her maiden voyage from Liverpool. The turbo-electric fast freighter in making her initial crossing of the North Atlantic in less than seven and one half days demonstrated the service which will enable her and three sister ships to replace the original five vessels of the Beaver class which were lost during the war. A fine example of the latest developments in marine design and engineering, the Beaverdel features widespread use of electrical installations. Her propelling unit is turbo-electric, in which steam generated electrical power at high voltage drives the motor which turns the propeller shaft. Electric winches also are used to speed the transfer of cargoes between

ship and shore. Almost one quarter of the huge cargo carrying space on the Beaverdel is refrigerated for safe transport of perishables. Electric fans ventilate all the holds, while "tell-tales" and long distance recording thermometers enable the ship's officers to keep a close check on the cargoes, at all times. Other peacetime uses of "war-baby" developments in use on the ship include radar, gyro-compass, and the latest radio telegraph communication sets. The new 10,000-ton vessel was given a rousing welcome upon her arrival at the busy port where she discharged 6,000 tons of cargo, some of it rubber from Singapore, and loaded Canadian farm produce—including meat, eggs and flour—for the United Kingdom. At right, Mayor J. D. McKenna of Saint John congratulates Captain B. B. Grant on the return of the Beaver line to the North Atlantic fast freight service.

### A.M.A. WILL ISSUE

#### 100,000 STRIP MAPS

Preparations are being made by the A.M.A. to issue more than 100,000 strip or sectional highway maps shortly.

These maps are of particular value to motorists, especially those who are visitors to sections of the province with which they may not be familiar.

The map gives full information concerning the type of highway, whether gravelled, hard surfaced or earth, mileages along the route, official appointments of the A.M.A. such as garages, filling stations, hotels and auto camps. There is a great deal of data of considerable value to car drivers.

Before issuing these new maps, the A.M.A. makes a careful check with the provincial public works department to obtain the latest up to date information concerning the highways. Thus every effort is made to provide authentic information, which is what the motorist needs and must have.

### TIME BOMBS

Change of habit is of little value in itself unless born from change of aim.

We often lose our heads just trying to save our face.

People sometimes grow so broad-minded that their thinking gets shallow.

The principal need of children is the need for more principle in parents.

Most of us look for happiness instead of for some great idea to which we can give ourselves and be happy.

When we say "business is business" do we mean that it's nobody's business if we swindle somebody?

These maps are distributed to branches of the A.M.A. in Edmonton, Calgary and Lethbridge. They also will be available at hotels, garages and filling stations.

### OFF THE RECORD

OTTAWA — Some people are never satisfied since a wit along Parliament Hill says that some people complain even when a politician gives his word and he keeps it!

A few people burn. Others just reflect their heat.

### THE WORLD OF WHEAT

The Dominion Brewers' Association, in conjunction with the Canadian malting industry have offered \$25,000 in prizes for malting barley. The field has to be 25 acres or more. The growing crop has to be inspected for trueness to variety and the threshed and cleaned grain either in bulk for sale to the maltster, or in sacks for sale as seed, has also to be inspected and tested.

Certain areas considered not suitable for the production of malting barley are debarred from the contest. Farmers who wish to sow 25 acres or more to malting barley in order to enter this competition should write to the department of agriculture of their provincial government to find out whether their district is in the contest area and for detailed particulars of the contest. The seed sown must be of an acceptable malting variety. OAC 21, because it is at present the best malting barley, certainly would stand the best chance. Naturally the seed should, if possible, be sown on clean summer fallow.

If any farmer who enters a field would care to write to me I should be glad to advise him how to manage and prepare a crop for field inspection.

It's when we begin to see the consequences Christianity would have for us that we begin to look for arguments against it.

### Rural Electrification

The farmers of Alberta have every sympathy from their city cousins in their desire for rural electrification. The life of a farmer is hard and lonely at the best of times especially the women folk. The inconvenience they put up with would drive most city women to drink or bridge. If anybody deserves the comfort and convenience provided by electricity it is the farm population.

It is therefore all the more important that rural electrification should be proceeded with orderly and steadily. It must be organized so that there will be no breakdown in the future, no reaction, no danger of explosion from over inflation.

These are some factors which must be borne in mind.

1. Electrification is an expensive business particularly in our sparsely settled western Canada. Prof. Andrew Stewart who a couple of years ago made a thorough survey in Alberta for the provincial government, found that only 54 percent of the farmers would probably take electricity, and the average cost of delivering electricity to them (not generating it or distributing it once it reaches the farmyard) would be \$576. If 71 percent of the farmers could be induced to take electricity the average cost would come down to \$519.

In one Manitoba municipality a preliminary survey showed 92 percent of the farmers anxious to get hydro power but when approached for a deposit only 63 percent paid.

2. It is just as costly for the farmer as for the power company even before any electricity is used. In Manitoba it was found that the cost of bringing service to the farmers yard averaged \$673 and in addition the cost to the farmer of appliances and wiring was \$611.

The cost of constructing power lines to 20,000 farmers in Alberta is established at \$12,000,000. This is only the first cost, for on top of that it is estimated that the cost to the farmers for wiring, appliances and equipment would be \$13,000,000.

Are the farmers able to pay this? In Manitoba almost half the farmers said they would need help to finance their end of the program.

3. There is a serious shortage of equipment. The representative of a major electrical company said in Calgary recently that only 10 percent of the desired amount of wire could be turned out in the first quarter of 1946. Manitoba had a program for electrifying 5,000 new farm homes this year but has already cut its objectives to 1,500.

Canadian Utilities has found that five percent of the customers in the Swallow area use less than the minimum of 20 kilowatt hours per month, paying therefore more than 25 cents for each kilowatt. Electricity is of little use to these customers. It is a luxury. On the other hand 41 percent are using more than 100 kilowatts per month at a cost of less than 7 cents each. These people are making electricity work and making it pay.

### OFF THE RECORD

OTTAWA — It looks like many Canadians are in favor of an inquiry or Royal Commission should be established in Ottawa in order to maintain a balance in the production as well as distribution of liquor in Canada, though it may be mighty difficult to preserve or to maintain a balance in liquor!

Our problem is not to get back to normal but to go on to change things by a new way to do everything.

Praise—What you receive when you are no longer here to hear it.

## Getting Off on the Right Foot

### AN OPEN LETTER TO CANADA'S EX-FIGHTING MEN

You and your fellow servicemen have fought for the peace, freedom and happiness we now enjoy.

We, in common with all true Canadians, believe that you should receive your fair share — a goodly share — of the prosperity that could not be ours without the victory you have achieved. We believe that, unless our ex-fighting men as a whole reach a good standard of living, Canada cannot attain that full measure of the prosperity for which we all hope.

We, at the Bank of Montreal, are anxious to do all in our power to help every veteran find his particular niche in the new peace-time Canada, either in a

job to his liking or in a business of his own that will afford him a full and prosperous life.

Reproduced in this advertisement are some thoughts from a booklet we have prepared to help veterans find their feet in civilian life. It is our hope that when you are struggling with the problem of starting afresh on "civvy street" the booklet may be very helpful to you.

Further, we extend a friendly invitation to you to drop in and chat things over with any one of our managers.

His knowledge of the present situation, local conditions, trends in business circles and the economic life of the community may be useful in the search for your niche. Perhaps he can offer helpful suggestions, sound advice, or a timely bank loan if you are thinking of branching out for yourself.

The booklet, "Getting Off on the Right Foot", is yours for the asking. Write, or see, your nearest B of M manager today.

FREE BOOKLET FOR SERVICEMEN

ON TIME AND MONEY — You will need to use them well in forging a future for yourself.

ON GETTING A JOB — What to say and how to say it in writing for a job.

ON APPEARANCE AND APPROACH — Look your smartest, speak out with confidence, state your ambitions clearly.

ON CROOKS — Typical examples of rackets to be on your guard against.

ON MONEY STOCK SALESMEN — Be wary of those gentlemen promising to let you in on the ground floor.

ON MAKING A LIVING — Training counts... the man who makes good money is a specialist.

ON GOING INTO BUSINESS — Dozens of "do's" and "don't's" on starting and running your own business.

ON HIDDEN CLAUSES — Look before you leap... trick phrases and concealed clauses cost the unwary a lot of money.

ON BUSINESS PROBLEMS — Don't hesitate to talk them over with men competent to give you sound advice.

ON SEEKING HELP — Your nearest B of M manager is ready, willing and glad to chat things over with you.

## Peacetime Problems

**DURING THE WAR** Canada rose to a foremost place among the nations of the world. The rapid advances made in the production of food and manufactured articles, in shipping, in science, medicine and many other lines of endeavour were very great, when considered in relation to the size of the population here. These results were achieved because the entire country was organized for the purpose of giving the fullest support to the winning of the war. In time of war there is almost nothing which is considered impossible to accomplish in the interests of speeding victory. When difficulties arose in production, transportation, or other vital places, expert advice was obtained and remedies were quickly provided. These methods, which proved so effective in war, should be equally useful in dealing with peacetime problems, some of which have already appeared in the form of the housing shortage, unemployment and the world food shortage.

### Demand Here Is Not Sufficient

In deciding future policies, both in internal affairs and in regard to our relations with other countries, there is need for continued public interest and co-operation in all that is undertaken. It is evident that there are opportunities for expansion here in many lines, in agriculture, in mining, in manufacturing and in scientific and cultural endeavour. Canada is possessed of great potentialities, but if they are to be developed to their fullest extent we must have either a much larger population or greatly expanded markets. The present population cannot absorb even the greater part of the products of our farms, factories, mines, forests and fisheries. This is a problem which vitally concerns the future development of this country and which will have a far-reaching effect on such matters as taxation, employment and farm prices.

### Much Acreage Still Unused

In agriculture there are opportunities for great development. Mr. J. F. Booth, associate director of marketing for the Dominion Department of Agriculture, recently stated that there are between 25,000,000 and 27,000,000 acres of land in Canada, which are unused, but are reasonably accessible and could be used for agriculture. These figures did not include land in the Yukon or the Northwest Territories. Mr. Booth estimated that this land would provide from 158,000 to 168,000 farms, including irrigated units. He pointed out, however, that these areas would be brought under cultivation only if Canada had a larger population or a greatly increased foreign market. These figures show the possibilities for the expansion of agriculture, and this is only one of the many potentialities of the country. To deal wisely with these matters we need the same type of co-operation and skill which contributed in so great a measure to the winning of the war.

Your grocer recommends it,  
—we guarantee it.

### Dogs Are Lucky

Owner Of Scotch Terriers Left Legacy For Their Care

A wealthy spinster of Lindfield, N.S.W., Australia, who died recently left a legacy of \$374 a year to her two Scotch terriers.

The money has been placed in trust with the King Edward VII Dog Home where the animals are enjoying unrivaled canine luxury. The terms of the will not only specify how the dogs are to be treated but also stipulate their diet and meal hours.

They get a build-up of egg flip and malt for breakfast at nine a.m. sharp. A comb and a rub-down with special ointments is scheduled at 11:30 a.m. and the terriers have a medical overhaul once a week. Their diet includes glucose, codliver oil, meat, rabbit, biscuits, green vegetables—and fish on Fridays.

### Super-Heat Material

Evolved By Britain's Wool Industry After Years Of Research

Britain has produced a blanket weighing less to the square yard than any other in the world. Shrink proof, moth proof and rot proof, it weighs only thirty-three ounces—for a full size. It looks like a quilt, has pure fleece stuffing with a Fortsan silk fabric cover, and traps millions of air pockets in the fleece, giving the maximum warmth with the minimum weight. Dressing gowns, bed jackets, cot-covers—all can be stuffed with the super-heat material, which was evolved after years of research by Britain's wool industry. Production of the new blanket at present is intended for export.

## Price Control And Rationing Information

**Q.—**If a tenant accepts a dwelling with the written agreement that he is renting same for a period of five months, can he be given notice to vacate if he refuses to move when this five-months' period is terminated?

**A.—**Yes, if the lease is for five months only, the owner may expect to regain possession at the end of that time. This lease for five months is called a "term certain" lease and the tenant is not entitled to any notice to vacate.

**Q.—**Are we going to have canning sugar this year?

**A.—**Yes, in 1946 each consumer will be allocated ration coupons to purchase ten pounds of sugar for canning purposes. You will be advised in the near future which coupons will become valid for this purpose.

**Q.—**Is there a ceiling price on a 1932 used car?

**A.—**Yes, there is a ceiling price on all types of used cars, no matter what year they were manufactured. Contact your nearest Wartime Prices and Trade Board office for information on ceiling prices for cars and trucks.

**Q.—**I wish to secure some maple syrup from Ontario. How should I do this?

**A.—**Consumers buying direct from producers must obtain purchase vouchers from their local ration board and mail these vouchers to the producer. It is illegal to send loose ration coupons through the mail.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

### ISLAND IS GROWING

Yokosuka, the world's newest "island", 200 miles south of Tokyo, has broken up into two steaming volcanic masses. Rising to a height of 70 feet and growing larger, the twin humps are almost identical in size and shape and are separated by a 50-foot channel of boiling, swirling water. White steam rising nearly 300 feet constantly puffed out from the fissures around the brown base and sides of the active mass.

Carrots, beets, and other vegetables are grown on the sod-covered roofs of their cabins by Alaskan sourdoughs.

## Guaranteed to Keep You "Regular" Naturally

or double your money back

### Sounds Simple

Compact Appliance For Motor Cars More Efficient Than Chains

Some ingenious devices have been born of the war. Now comes a simple, compact appliance, in the form of a tire-track, that will pull a motor vehicle out of mud, ice or snow, where chains would never prove efficient. It consists merely of seven small, but heavy, steel plates, all hooked together, that provide a two-foot runway. No jack is needed. Just drop it in front of a rear wheel and attach a cable to the bumper. When clear, you fold it up to a size no larger than a cigar box. Strange that, of all the motorists who have huffed and puffed, made the air blue as they stripped the gears of their cars, none has ever thought of it before.—Hamilton Spectator.

### Not Hard Task

Rehabilitation Of Women In Canada Has Been Satisfactory

Rehabilitation of women, who served in the armed forces had not been the problem expected, Dr. Olive Russell of Ottawa, executive assistant to the director-general of rehabilitation, Department of Veterans Affairs, said.

Addressing a women's rehabilitation conference in Saskatoon, Dr. Russell said about 24,000 women had been demobilized and all but approximately 400, as far as she knew, had been successfully rehabilitated. Ex-Servicewomen were showing initiative and adaptability and had a definite contribution to make to any community.

One machine tabulating 400 names a minute and running 40 hours a week would require two years and eight months to count all the people in the United States.

Most nuts are at least half fat and are so high in protein that they can alternate at times for meat in a main dish.

## The Premier Beef Breed

The smoothness, quality, fleshing properties and hornless character of Aberdeen-Angus cattle have commended the breed to beef producers in many lands. The breed can also serve you.

## 2 WAYS TO SWEAR OFF

Are sleepless nights warning you to stop drinking tea and coffee? Has a friend told you how much better *she* has felt since she got rid of caffeine? And do you dread the idea?

### The Hard Way

Some snappy device like this handy gadget would be one way to crack down on your desire for tea or coffee. A bit impractical though!

### The Possum Way

Drink Postum instead! Such a delightful way. Delicious flavor, hearty warmth and aroma. And not a trace of caffeine or any other drug to upset nerves or digestion.

Easy to fix. Make Postum right in the cup, just by adding boiling water or hot milk. Costs less than 1¢ a serving.

# Postum

A Product of General Foods

## A Hard-Hitting Fleet For Unified Defence Of Western Hemisphere Being Planned

UNIFIED Canadian, British and American naval action as officially indicated was regarded by observers as applying the Three Musketeers principle of "all for one and one for all" to the future strategic defence of the western hemisphere and the Atlantic. This was the famous slogan of the Dumas story of Athos, Aramis and Porthos slung with d'Artagnan, and with Britain, United States and Canada in the modern international role.

"Our (Canadian) Navy will be trained to work in co-operation with the British or the American Navy. . . It will be a potentially hard-hitting modern fleet whose efficiency will be equal to that of any in the world," Senior Canadian Defence Minister Douglas C. Abbott said.

This rounded out still further the hemispheric defence picture and indicated that all three of Canada's armed services are being designed to work in the closest co-operation with Great Britain and the United States. Plans for the future were drawn against the backdrop of the war, when the R.C.A.F. and the R.A.F. worked practically as one force; in which the Canadian troops fought under joint Allied command, and in which the Royal Canadian Navy undertook certain jobs including the North Atlantic convoy route, in conjunction with the British Navy and details of the American fleet.

Canada became the world's fourth naval power with the fall of Germany, and the third with the fall of Japan. With the plans for the peace time fleet, as outlined by Abbott, it became evident that such a fleet was being designed primarily for the quickest adaptation to co-operation with either or both of the British and American navies.

In total manpower the active Canadian Navy will be ten times as strong in this postwar era as it was in the pre-war or, 16,000 men against the pre-war 1,600, but there the comparison ends, for the striking power of the post-war navy will be infinitely more than ten times the striking power of the pre-war navy, even taken by itself.

Particular significance has been seen in the emphasis by Canadian defence departments on swift expansion into a wartime strength for all three of the armed services, should an emergency arise. All three services will carry a reserve considerably stronger than their active strength.

The British government's white paper, issued on Feb. 22, already had outlined permanent commitments for British collaboration in defending the security of the commonwealth. These specifically were mentioned as safeguarding of communications and the upkeep of essential bases. The white paper stressed the earnest desire to continue in peace the full partnership of war.

In tune with Canadian official announcements the British white paper keynote, as summarized by the United Kingdom information service, is "a determination to maintain, in collaboration with the dominions and India, British armed forces strong enough to meet all commitments, imperial and international, while pursuing a research program that will insure these forces being supplied with the most up to date equipment available." This modernness of equipment similarly was emphasized in Canadian pronouncements.

Wartime and recent developments on land and in the air have seen Canada and the United States taking further steps to seal up the "open gateway to the Western Hemisphere" in the Canadian Arctic and through the Northwest and Alaska.

At sea, while Abbott's announcement of Canada's permanent Navy indicated a force equally equipped to operate in either Atlantic or Pacific Ocean, the emphasis of wartime experience has been a Canadian Navy operating mainly in the Atlantic in conjunction with the British Home Fleet, while the American Navy takes care of the Pacific. But the spectre of a possibly defenceless Western Hemisphere, as pictured by many American observers during the 1940-1941 stages of World War II, when the Germans were threatening Britain, left an impression that has been evident in later wartime and post-war strategy planning.

In the light of Canadian official statements for post-war armed forces and the Navy's collaboration with British and American fleets, it was noted that the British White Paper specified definite commitments, only supportable by Naval strength, through the Mediterranean and into Far Eastern waters.

These included the British Government's definite statements that it would: 1, provide forces at the safety point in Germany to insure the surrender terms being carried

out; 2, a small contingent forming part of British Commonwealth occupation force in Japan (from which Canada is significantly abstaining although invited to join); 3, forces sharing in the occupation of Austria; 4, forces sharing in the occupation of Italian territory; 5, forces for Palestine; 6, forces to assist the Greek nation in recovery "which will remain till the elections have taken place and conditions in Greece permit their withdrawal;" 7, a force to deal with the liquidation of Japanese occupation in Southeast Asia.

These commitments thus called for maintenance of the ancient "red line of Empire" through the Mediterranean, the Suez and the Indian Ocean, and it was noted that they took no cognizance whatever of Russian charges that Britain is endangering world peace and democracy by maintaining troops in Greece and Indonesia, except to say that the troops will stay until their job is done.

As part of a unified naval strength, each component part as strong as its total, the Canadian Navy and Canadian defence policy in general thus appeared to have taken on global dimensions. The picture gave a clearer meaning to Abbott's words. "Our Navy will be trained to work in co-operation with the British or American Navy." It was one more of many expressions of official realization that Canada, as the Western Hemisphere gateway, occupies a key position in all future strategic plans which are primarily designed to make a fortress and world operation base of North America against the chance of future war.

### Has Solved Problem

Woven Nylon Great Help In Dressing For Surgical Cases

The Scientific American says one of the plagues of surgery is to change dressings—the gauze sticks to the tissues, and when taken off may tear or rip the wound open again. But now, woven nylon, originally improvised in Pacific army hospitals from nylon window screenings, seems to solve the problem.

Since these screens are flat and a little stiff, they come off easily and both surgeons and patients were pleased at the absence of pain or bleeding when dressings were changed. On top of all that the wound underneath heals more smoothly and is in better shape for skin grafting.

The jet-propelled P-80 Shooting Star could cross the Atlantic in a single morning.

**RESTORED TO DUTY**—The court-martial sentence of Capt. Charles B. McVay III, has been remitted in its entirety and he has been restored to duty. McVay was the captain of the cruiser Indianapolis, which was sunk in the Pacific with a loss of 880 officers and men.

### Adequate Supplies

Canada Has Ample Seed With Exception Of Red Clover

With the exception of Red Clover seed, Canada was assured of adequate seed supplies to provide for the 1946 seeding requirements, said Howard Gorsline, Senior Marketing Assistant of the Plant Products Division, Dominion Department of Agriculture, in a recent address at Toronto on "Requirements and Supplies of Seed in Canada." As in other years, Mr. Gorsline pointed out, there would be certain varietal shortages but the over-all supply of good quality seed oats, barley, wheat, corn, peas, beans and oil-bearing crops was satisfactory. At the same time, the supply of field root and garden vegetable seeds was more than adequate to fill the demand.

With regard to red clover seed, the Ontario and Quebec crops encountered unfavourable harvesting conditions in the fall of 1945, with the result that the total crop amounted to about 3,000,000 pounds, or 40 per cent. less than the 1944 harvest. However, a carryover of more than one million pounds held by Canadian seed firms, and the movement eastward of a large proportion of the 1,200,000 pound crop of single cut red clover in Alberta would bring the total supply relatively close to providing normal Canadian requirements estimated at 6½ million pounds. Although not as desirable as the medium cut clover, the single cut clover from Alberta would fill a definite need in many districts.

### THE ONLY CURE

In Mineola, N.Y., drunken drivers will be tested by making them say: "Around the rough and rugged rocks the ragged rascal ran." This is sheer foolishness. The only accurate test for alcohol is a blood-test, as employed in Norway. And in Norway, we should like to point out, drunken driving is virtually unknown because it is punished very severely.

## Says The World Must Have A Breathing Spell To Gather Strength And Get Its Bearings

"UNTIL the world has a breathing spell in which to gather its strength and get its bearings it is futile to think of creating any genuine laws among nations," United States Senator J. William Fulbright from Arkansas, told members of the Canadian Club of Ottawa at the Chateau. "And, yet, until we are able to agree upon rules governing at least the production of atomic bombs, there can be little confidence in our security," he said.

### Will Reflect Heat

New Wallpaper Produced By English Women Scientists

A new wallpaper which enables a room to be warmed up in one-third the normal time has been produced by Englishwomen research scientists. This remarkable fuel saver actually reflects the heat from an electric fire instead of absorbing it into the wall. The action is due to the metal decoration with which the paper is encrusted and which prevents heat being lost in the plaster of the walls.

### Linen Loveliness

7102

by Alice Brooks

Graceful colonial belle gathering pretty posies on your pillow cases and sheets. This embroidery's easy. Such stitchery would be charming on scarfs or towels, too! Pattern 7102 has transfer of a 6½ x 20½, two 5½ x 15-inch motifs; edging instructions.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Senator Fulbright, one of the youngest United States Senators, first won wide attention by his introduction into the United States Congress of the Fulbright Resolution which called upon the U.S. to give its full co-operation in post-war international efforts to maintain peace.

The speaker said there must be some abrogation of national sovereignty if the world was to be saved from destruction.

He said Prime Minister Mackenzie King and Foreign Secretary Ernest Bevin of Britain had given the lead in suggesting this new approach to finding a solution to lasting international agreement.

"But it was disappointing that these good suggestions were not taken up by the delegates who met at the London UNO conference."

The senator pointed out that although he may be unduly pessimistic, it was difficult for him "to see the pattern of a happy future in the atomic bomb, jet propelled airplanes, Mr. Stalin's latest five-year plan, and our own vacillation on critical issues."

"If we follow a policy now, similar to that we followed after the last war, the result is likely to be the same. In other words, what I really am suggesting is that something different be attempted."

"I submit, the sovereignty that must give way to law if anything different is to come out of the UNO."

The fundamental principles upon which all successful communities of peoples have been founded is law. Law in the early family and tribe, just as it is in this nation today, merely meant rules of conduct to which all were subject, and which were enforceable by the collective might of the community. Without these rules of conduct there was chaos; every man against every other man. Without these rules there would be no commerce, no security of the person, no peace, no opportunity for progress or decency of any kind.

"If it be true that there can be no lasting peace among men without law, then our policy should be clear," declared the senator.

Suggesting "boldness and originality" in the creation of rules of conduct for the peoples of the world, the United States senator said the logical subject matter for its beginning was armaments, including the atomic bomb. "The machinery to begin with may be created by relatively simple amendments to the charter of the United Nations. The modification of the veto provisions and the delegation of certain rule making powers to the UNO would go far toward the accomplishment of our purpose."

"I quite agree, with which I am sure is in the minds of many of you, that it is all very well to talk of rules of conduct, but under the present unsettled conditions in the world it is not very practicable or hopeful of immediate accomplishment."

"That view has new emphasis from your own recent experiences (the spy probe). My point is that granted we are unable to obtain law at the moment I think it is highly important, nevertheless, that we recognize that law is our ultimate goal."—Ottawa Citizen.

### Becoming Important

Finger Printing Not Used Only In Connection With Crime

In order to guard against repeaters Mexico is going to take the thumbprints of 5,000,000 voters when they register for this year's presidential election. It will be a huge task and a costly one. Yet, it demonstrates once again the value of the fingerprint for absolute and universal identification purposes.

Due to the exigencies of the war, more Americans had their fingerprints taken than ever before. Those in the military service and on war jobs got away from the idea that the fingerprint was connected only with crime and wrong-doing. Some day, no doubt, it will be the most important part of every American's birth record.—Boston Post.

A medical man says that those who live longest are those who never do anything in a hurry. This should encourage parents who worry about the length of time it takes their children to go to bed. 2664

**MUSKOX MAY REVOLUTIONIZE TRAVEL FOR PRIESTS OF SUB-ARCTIC**—Travelling may be revolutionized by the Muskox Operation for priests of the sub-Arctic who, like Father Roland Coutemanche of Eskimo Point, north of Churchill, have always used dogs to reach their Eskimo parishioners. ## Contest Awards Are Tax Exempt

The \$25,000 prize moneys in the 1946 National Barley Contest will not be considered taxable income of those who win them.

This means that anyone awarded a prize will not be required to pay income tax on it.

The ruling has been given by the Deputy Minister of Taxation at Ottawa. Prizes won in contests of this kind the tax branch said are not taxable.

Of the total \$25,000 in prize

money \$18,750 is to be distributed in the western division. This includes the three prairie provinces and the Peace River section of British Columbia.

Entries for the contest close June 15th

### COUPON CALENDAR

April 4—Meat M31, sugar-pre-serves S5, butter R5.  
April 11—Meat, M32.

Get behind the Community Club!

Young people and, in fact, all people, need talking with, not to.

## LOCAL NEWS

The Carbon Junior Athletic Club will hold a combination whist and bridge drive on April 5th. The drive will be held in the two upper rooms of the school and will start at 8.30. Lunch will be served after cards. Prizes will be awarded.

Thirty five cents will give you an evenings relaxation and enjoyment with your family and friends. Support your boys' and Girls' club so that they can partake in sports and build active healthy bodies. Please be prompt.

There will be a service in Christ Church Sunday, April 7 at 3 p.m., Canon T. B. Winter in charge.

The many friends of Andrew Walker will be pleased to learn that he has returned to Carbon after spending the winter at Penticton, B.C.

The Julius Ohlhauser family left this week for Calgary where they will reside in the future.

All Carbon elevators will be closed every Wednesday afternoon from now until August 1.

There will be a meeting of the golf club in the Village office on Monday evening, April 8th.

Mr. and Mrs. W. Shantz were Carstairs visitors over the week-end.

Week-end visitors at the A. Wallace home included Mr. and Mrs. H. Bradley and Miss J. Moker R.N., Calgary; Mr. and Mrs. E. Theaker, Eatonia, Sask. and Gordon Bradley of Lynden, Wash.

Don't forget the Legion dance in the Scout hall, Friday, April 26th. Rosebud Orchestra.

Why doesn't somebody do something? Well, you're somebody—aren't you?

Cpl. A. P. Baerg of Swallow will arrive from overseas this month by air.

Mr. and Mrs. Leslie Spry and family of Toronto are visitors at the home of Mr. and Mrs. Eli Spry.

The Community Club started work on the park this week.

Morris Switzer spent Sunday in Calgary.

The CGIT girls held a successful "Pot Luck Supper" on Tuesday evening.

Frank Emery was a Calgary visitor this week.

Anyone having baseball or hockey equipment should turn same in to Ernest Fox or Glen Levagood immediately.

### PAGES SMALLER, BUT ONE MORE!

This week we have reduced the size of The Chronicle from six to five columns. But we have added one more page.

The change was made necessary owing to press trouble. Our press appears to like to work double and refuses to print a single page any more without considerable coaxing from the operator. And our pressman, having a certain amount of Irish blood in his veins, is not very good on the coaxing business.

New type has recently been installed in our linotype machine so don't be shy about sending the news and help us give you a bigger and better paper. And don't forget that two bucks for your subscription. We can surely use it these days. Ed.

Men become fit for freedom when they unite for what is right, not when they divide over their rights.

Atomic power can smash cities. Spiritual power can change them.
